# Integrated Health & Safety Programmes

**Line Business Services Ltd (Line BSL) is a leading provider of Safety Management and specialist support services to a wide range of public and private sector organisations. We offer our clients optimum value through an extensive range of services spanning the spectrum of safety legislation across a wide range of industrial and commercial operations.**

Successful Health & Safety management requires commitment at senior level to build a positive culture and work ethic. Training, systems and procedures have a significant role to play in reducing risk, however, when combined with positive behaviours and attitude change, risk solutions become part of the organisation's values and culture.

Line BSL offers tailored services, to help you make Health & Safety as much a part of your business process as is statutory accounting, personnel management and production controls. Our consultants are experienced practitioners at all levels and have successfully supported clients to implement major culture change programmes leading to improvements in operating performance and the evolution of long-term business strategy.

## Consultancy

Line BSL adopts a proactive and systemic approach to Health & Safety offering solutions to assist you in the organisation, development and integration of good Health & Safety practice into your business. The development of risk reduction measures is more cost effective than the expensive and often painful consequences of an incident.

Our consultants are sympathetic to your needs and are rigorous in identifying cost effective, practical and long lasting solutions to your problems. We believe that good risk practice is an essential element in modern management. This will reduce losses and insurance costs as well as protect the most valuable asset, your staff.

### Aim

- To work in partnership with you to provide cost effective risk management solutions.
- To add value to your business by reducing exposure to loss situations.
- Helping your business towards compliance with legislation and corporate reporting.

### Process

- Identification of risk exposures
- Examination of current practices
- Development of suitable risk mitigation actions
- Development of performance standards
- Advise on an implementation programme to introduce culture change

### Services

- Audits, Reviews and Risk Assessments
- Guidance and support in all areas of Health & Safety legislation
- Policy and procedure reviews and writing service
- 'Competent Person' delegation service
- Specialist monitoring, surveys and analysis
- ISO 14001 accreditation and support
  - Noise
  - Asbestos
  - Air and Dust

# Training Programmes

Line BSL offers a structured approach to training to help you choose the right training courses for your people and ensure that they receive precisely the training you require to improve their knowledge and understanding of health & Safety.

We offer both accredited and bespoke training options. Accredited courses are offered through the Institution of Occupational Safety & Health (IOSH) and the National Examination Board in Occupational Safety & Health (NEBOSH). Courses are highly interactive and maintain a superior standard of content. Those taking part in accredited courses will, upon passing the final examination, be presented with certificates awarded by the accrediting body.

## Accredited Training Programmes

**IOSH Managing Safely** - This course is designed for staff with supervisory or management responsibilities for ensuring best practice within the organisational framework and compliance within relevant legislation.

**NEBOSH General Certificate** - Designed for Managers, supervisors, safety representatives and those with a responsibility for safety in the workplace. The successful completion of this course fulfils the entry requirements for NEBOSH Diploma courses.

**NVQ Occupational Health and Safety (level 3 & 4)** - Accredited programmes developed for candidates working in the general area of health and safety, those managing a health and safety function and managers having a significant responsibility for safety.

## Bespoke Training Programmes

We can incorporate your company's policies and working practices into a course design, making it relevant to your needs as well as being practical in response to legislation. Those attending will be able to identify with the training because the examples used to illustrate legislation will be related to their environment.

Generic courses are offered as both in-house and open options for delivery at either your premises or training venues throughout the UK. The following list is an example of the subjects we cover:

- Risk Assessment
- Health & Safety Awareness (various levels of staff)
- Display Screen Equipment & Workstation Awareness
- Display Screen Equipment & Workstation Assessor
- Manual Handling
- Manual Handling Train the Trainer
- COSHH Assessment
- Fire Safety Training and Consultancy
- Fire Warden
- Accident Investigation and Reporting (RIDDOR)
- Health & Safety Inspection and Auditing
- Asbestos Management
- Environmental Standards
- Food Hygiene
- Construction (Design and Management) Regulations
